

OUR MISSION

To enable rural pastors to spread the Gospel in Tanzania. Our main tool is to provide safe clean water to these pastors, churches and rural communities. This helps the humanitarian water crisis and provides the pastor with an outreach tool to invite thousands of nearby villagers to come share the “living water” and receive the **Gospel of Jesus Christ.**

OUR PROGRESS

By year end we will have completed our **100th** safe water project covering all **26** Regions of Tanzania. All projects are installed on rural church grounds. **Thank you to those of you who have supported our mission.** There are children alive in Tanzania today because of you!

OUR PLANS

We are raising funds for an additional **18** projects in 2026. Join us!

HUGE CHALLENGE REMAINS

World Water Week 2025 reminds us of the staggering challenges that remain for us. Despite real gains, billions of people still lack access to the basic human right of safe water, sanitation, and hygiene. 2.1 billion people are still drinking unsafe water. 3.4 billion still don't have access to safely managed sanitation. 1.7 billion are still living without basic hygiene in their homes. Rural villages, children, and minority groups are still suffering with the burden falling largely on women and girls, who still spend precious hours every day collecting water.

This is happening right now in rural Tanzania and because of your support, Safe Water Africa can provide lifesaving clean water to thousands. Locating our water projects at rural church sites give us an even bigger blessing in that we get to introduce them to the “living water” and the Gospel of Jesus Christ.

To quote our friends at Waterstep, “this work is hard”. The magnitude of the need is enormous. Our goal is for every person to have access to safe drinking water and for God to use this water to attract villagers to His Church so they may hear the Gospel preached. Thank you for your support in funding our mission.

HONOR A LOVED ONE

You have a unique opportunity to honor your hero or loved one with a tribute that will last for generations to come by sponsoring a life sustaining memorial safe water project in their memory. We have put **18** memorial projects in place so far including memorial plaques at each site. What a wonderful way to leave a lasting legacy for a loved one. More details at wwhudson2021@outlook.com
